

Brief Synopsis
Buddies

Buddies is the story of four men whose friendship spans their entire lifetime. They were all born and raised in a small town with small town values and perspectives. Even as youngsters, their personalities and characters were distinctive and precursors for their futures as adults. Joey was the risk taker and the rule breaker; Billy was the negotiator who always wanted to keep the peace; Roy was the pragmatist and the skeptic; and, Sam, the smallest in stature was brilliant but unsure of himself and afraid to color outside the lines.

Joey depended on a pro career in the NFL but an injury popped that bubble. The brash womanizer had a couple of failed marriages and a career in business that went nowhere. It is no surprise that Billy, the arbiter of the group, became a successful lawyer. Even less unexpected was that the pragmatic Roy had a career in scientific research. Sam, still unsure of his worth, gravitated toward a career in psychology, perhaps drawn by a need to help others who don't understand their own value much like Sam himself.

Other than Joey, the others are all settled in good careers and marriages. But the four friends' lives are all turned upside down when they make a new friend, Raul, and more specifically, when his incredibly beautiful and alluring wife, Sasha, comes into their lives. It seems that Sasha has big plans for a future that doesn't include Raul but it does include his \$100 million. She wants to rid her life of him without getting her own hands dirty. Sasha turns to the buddies and wraps them all around her finger to help her attain her dream.
