

Eschaton
Brief Synopsis

Danika Dewan, 32, is a brilliant young astrobiologist who is also an avid advocate for the prevention of worldwide extinction. She works on the nature of life in the Universe, the evolution of life on Earth and its future. She has excelled in her field and has won the praise of her colleagues. If pressed for an answer, most scholars in the field would cite more of Danika's work in their papers than any other expert. Her colleague and romantic interest is George Traville. They begin to realize that Arvid Larsen, the lead scientist in their corporation, is corrupt and part of an underground movement to destroy the Earth. When Danika and George discover that the acceleration of the extinction process all over the globe is tied to an alien presence and develop a plan to rectify it, the chief scientist targets them for extinction.
