

The Nightingale Sings *Synopsis*

The Nightingale Sings is a story of magic and intrigue that takes place in Egypt during World War II. The Reverend John Wilson, a British minister of the Church of England, travels to Egypt, an ally of Great Britain, to help with the war effort. Many young soldiers are being injured and killed on the front and he wants to do his part to tend to their injuries, pray for their recovery or pray for their departed souls.

An intriguing mystery arises while John Wilson is in Egypt involving a large local date farm and priceless artifacts that are going missing and obviously being stolen from the nation and the people of Egypt. John lived in Egypt when he was a young boy while his parents, both archeologists, were discovering some of the hidden treasures of Egypt. He formed a close relationship with an Egyptian boy, Mustapha, who he encounters during his return. Mustapha's pathway in life is far removed from John's. Mustapha became a mystical figure who has spiritual presence and powers that were bestowed upon him by the Egyptian gods.

John realizes that the mysteries of Egypt go far beyond the pyramids and the sphinx after his superior in the Church of England is found murdered. It is then he begins to make a connection between the missing Egyptian artifacts and corruption of the highest order. In his quest to solve the mystery, John is assisted by a little magic and a touch of the supernatural from beyond.
